DANIEL COBOS

SOFTWARE DEVELOPER

PROFESSIONAL PROFILE

I am a passionate software developer focused on creating robust and efficient solutions that enhance user experience and effectively solve problems. I excel in collaborative environments, leveraging my interpersonal and creative skills. My work ethic is based on punctuality and a commitment to excellence. I always strive to exceed expectations to deliver high-quality products that meet the highest standards.

My technical skills include fluency in languages such as Java, Python, JavaScript, and TypeScript, enabling me to approach projects from various perspectives and find optimal solutions.

- Network security

PROJECTS

Tu-home

This project revolutionizes real estate management by providing comprehensive oversight of all aspects, from users to properties and contracts.

TrackingUIS

This project enables real-time tracking of university buses. Through an interface, users can conveniently monitor the bus locations, ensuring efficient transportation throughout the campus.

IoT Agile

This project involves creating a corporate website that combines robust functionality with modern and attractive design. Thanks to its smooth navigation and responsive design, users can easily interact with the company's offerings across various devices.
